Present from your BlackBerry smartphone

 **BlackBerry®**

Feature	Benefits
Easy set up	BlackBerry Presenter is easy to use – to start your presentation, all you need to do is plug it in and select "Present" on the wizard on your BlackBerry smartphone. There are no settings to worry about, as the single, mounted button on top of the device is used to put it to sleep, wake it up, or reset it to show a new presentation.
Present Microsoft PowerPoint files wirelessly from your BlackBerry smartphone	Simplify your presentation experience with BlackBerry Presenter. Use it to present your Microsoft PowerPoint files from your BlackBerry smartphone.
NTSC/PAL support	Designed for the mobile professional, BlackBerry Presenter can work with displays that use NTSC or PAL video formats, which allows for the widest range of compatibility when you're travelling overseas for business.
Carrying case included	BlackBerry Presenter comes with a lined carrying case with a magnet closure that protects it when you place it into your carry on luggage or briefcase.
Supports 24 animations and 55 transitions	BlackBerry Presenter supports most of the animation and transition in the slides from Microsoft PowerPoint 2003 and 2007, so feel confident that your presentation is accurately being shown. Some examples of transitions include: Blinds, Checker, Zoom, Cover, Diamond, Fade, and Strips. Examples of animations include: Blinds, Dissolve In/Out, Peek In/Out, Wedge, Wheel, and Wipe.
Loop mode	You can set the time between slide transitions and leave BlackBerry Presenter running as you deliver your presentation. The on-board memory can support up to 100 slides – so it's great for tradeshows and other display-type presentations.
Freeze mode	Find the slide you need to reference by freezing the slide on screen so you can freely browse through the rest of your presentation on your BlackBerry smartphone without changing what's on the display. Once you've reached your target slide, unfreeze the presentation, and your new slide will be presented.
Speaker notes available	Available on Microsoft PowerPoint 2003 and 2007, view speaker notes while you present, change slides, and navigate your presentation directly from your BlackBerry smartphone.
Upgradable application and BlackBerry Presenter software	Download updates for your BlackBerry smartphone and BlackBerry Presenter device software for added features and functionality.

You want to be able to deliver your presentations with ease. So leave your laptop behind and use BlackBerry Presenter to deliver your presentations. Designed for professionals who are on the go, you simply plug it into a projector or monitor, and present Microsoft PowerPoint files wirelessly from your BlackBerry smartphone. Discover an easier way to present and impress your audience with BlackBerry Presenter.

System requirements

BlackBerry Presenter requires:

1. An Intel® compatible computer running Microsoft Windows XP® or later operating system and has an available USB port that is compliant with USB 1.1 or higher;
2. BlackBerry® Device Software v4.6 or later
3. A video output device and a VGA cable or an S-Video cable. BlackBerry Presenter is not supported by the BlackBerry Curve 8300 Series and/or BlackBerry Pearl Flip 8200 Series smartphones.
